

Naïf Arab University for Security Sciences

College of Forensic Sciences

Department of Forensic Chemistry

**Evaluation of Pregabalin toxic effects and determination
of its concentration in the blood of albino rats.**

Presented by

Rawan Abdulrahman Almowalad

Main Supervisor

Dr. Hatem Abdel Moniem Ahmed

Co-Supervisor:

Dr. Samah Fathy Ibrahim

Submitted in partial fulfilment of the requirement for the master's degree

of Forensic Chemistry (Master of Drug and Poisons Analysis)

Riyadh

1440 – 2019

Table of contents	
Topic	Page
Arabic Abstract	I
English Abstract	II
Dedication	III
Acknowledgment	IV
Table of contents	V
List of tables	VII
List of figures	IX
List of abbreviations	XII
List of appendices	XIII
Chapter 1. Research Problem and Objectives	
Introduction	1
The main question of the study	1
Objectives of the study	2
Importance of the Study	2
Background overview	3
Literature review	11
Chapter 3. Methodology	
Methodology	16
Samples	16
Chemicals	16
Instrumentation	17
Methods	18

Chapter 4. Results and Discussion	
Results	26
Discussion	65
Chapter 5. Recommendations and Suggestions	
Conclusion	71
Recommendation and suggestions	72
References	73

LIST OF TABLES		
Table #	Name	Page
1	The physical and chemical properties of the PRG.	3
2	GC-MS analytical conditions.	25
3	Acute and subacute oral toxicity of PRG.	26
4	Results of organs weight in acute PRG toxic groups.	28
5	Results of organs and body weight in sub- acute PRG toxic groups.	30
6	Vital parameters of acute PRG toxic groups.	32
7	Vital parameters of sub-acute PRG toxic groups.	34
8	Results of righting reflex test in acute PRG toxic groups.	37
9	Results of righting reflex test in acute PRG toxic groups.	38
10	Results of open field behavioral study test in acute PRG toxic groups.	39
11	Results of open field behavioral study test in acute PRG toxic groups.	41
12	Catalepsy test results in acute PRG toxic groups.	44
13	Catalepsy test results in sub-acute PRG toxic groups.	45
14	Complete blood picture results in acute PRG toxic groups.	47
15	Complete blood picture results in sub-acute PRG toxic groups.	49
16	Liver function and kidney function tests result in acute PRG toxic groups.	51
17	Liver function and kidney function tests result in subacute PRG toxic groups.	53
18	Effect of PRG on scoring of liver histopathological picture in rats.	61

19	Effect of PRG on scoring of kidney histopathological picture in rats.	61
20	Effect of PRG on scoring of soleus muscle histopathological picture in rats.	61
21	Ante-mortem and post-mortem blood concentrations of PRG.	63

LIST OF FIGURES

Figure #	Name	Page
1	The chemical structure of PRG.	3
2	The chemical structure of N-methylpregabalin.	4
3	Schematic of the GC/MS system.	9
4	Mass spectrum of water.	10
5	The chemical structure of gabapentin.	16
6	Semi auto biochemistry apparatus.	17
7	Automated hematology analyzer.	17
8	Gas chromatography mass spectrum (GC-MS).	17
9	Rats behavior test.	19
10	Rats behavior test.	20
11	Percentage of toxic manifestations among PRG toxic groups at two hours.	26
12	Percentage of toxic manifestations among PRG sub-acute toxic group 3	27
13	Percentage of toxic manifestations among PRG sub-acute toxic group 4	27
14	Results of body weight in acute PRG Toxic Groups	29
15	Results of body weight in subacute PRG Toxic Groups	31
16	The temperature of acute PRG toxic groups compared with control.	32
17	The respiratory rate of acute PRG toxic groups compared with control.	33
18	The pulse of acute PRG toxic groups compared with control.	33
19	The temperature of sub-acute PRG toxic groups compared with control.	35

20	The respiratory rate of sub-acute PRG toxic groups compared with control.	35
21	The pulse of sub-acute PRG toxic groups compared with control.	36
22	Results of righting reflex test in Acute PRG toxic groups compared with control.	37
23	Results of righting reflex test in subacute PRG toxic groups compared with control.	38
24	Results of (Latency time and time spent in edges) open field behavioral study test in acute PRG toxic groups.	40
25	Results of (Ambulation frequency and Rearing) open field behavioral study test in acute PRG toxic groups.	40
26	Results of (Latency time) open field behavioral study test in sub-acute PRG toxic groups compared with control.	42
27	Results of (time spent in edges) open field behavioral study test in sub-acute PRG toxic groups compared with control.	43
28	Results of (Ambulation frequency) open field behavioral study test in sub-acute PRG toxic groups compared with control.	43
29	Results of (Rearing) open field behavioral study test in sub-acute PRG toxic groups compared with control.	44
30	Catalepsy test results in sub-acute PRG toxic groups compared with control.	45
31	Catalepsy test results in acute PRG toxic groups.	46
32	Box error graph of complete blood picture results in acute PRG toxic groups.	48
33	Box error graph of complete blood picture results in sub-acute PRG toxic groups.	50
34	ALT and AST tests result in acute PRG toxic groups compared with control.	51
35	BUN and Creatinine tests result in acute PRG toxic groups compared with control.	52

36	CPK test result in acute PRG toxic groups compared with control.	52
37	ALT and AST test result in sub-acute PRG toxic groups compared with control.	54
38	BUN and Creatinine test result in sub-acute PRG toxic groups compared with control.	54
39	CPK test result in sub-acute PRG toxic groups compared with control.	55
40	Effect of PRG on liver histopathological changes.	56
41	Effect of PRG on kidney histopathological changes.	58
42	Effect of PRG on soleus muscle histopathological changes.	60
43	Total ion chromatogram of PRG – ECF derivative.	62
44	Mass spectrum of PRG – ECF derivative.	62
45	SIM spectrum of PRG – ECF derivative.	63
46	Calibration curve of PRG from extracted spiked blood.	63
47	Ante-mortem and post-mortem blood concentrations of PRG.	64

List of Abbreviations

Abbreviation	Name
ALT	Alanine Aminotransferase.
AST	Aspartate Aminotransferase.
CNS	Central Nervous System.
CK-MM	Creatine Kinase.
DEA	Drug Enforcement Administration.
ECDD	Expert Committee on Drug Dependence.
FDA	Food and Drugs Administration.
GABA	Gamma-Aminobutyric Acid.
GC-MS	Gas chromatography-mass spectrometry.
HPLC-MS	High-Performance Liquid Chromatography – Mass Spectrometry.
I.V.	Intravenous.
IR	Ischaemia-Reperfusion.
LC-MS	Liquid Chromatography–Mass Spectrometry.
m/z	Mass to Charge.
PRG	Pregabalin.
S.FDA	Saudi Food and Drugs Administration.
US	United States.
WHO	World Health Organization

List of Appendices	
APPENDICES	Page Number
Controlled psychotropic substances in Saudi Arabia list by S.FDA.	80
Lists of: Scheduling Actions, Controlled Substances And Regulated Chemicals by US DEA.	82
